Qus : 2 nimcet PYQ 2024 (<https://www.test.aspirestudy.in/library/pyq/1/nimcet?view=year&key=2024>)

Rajesh will not go to the concert if Rakesh goes. Rakesh will go to the concert if his dog barks three times.

Based only on the information above, which of the following must be true?

1

Rakesh will not go to the concert unless Rajesh goes.

2

If Rakesh's dog does not bark three times, then Rakesh will not go to the concert

3

If Rakesh's dog barks three times, then Rajesh will not go to the concert

4

If Rajesh doesn't go to the concert, then Rakesh will go

The primary purpose of cache memory in a computer system is

- 1 to temporarily store frequently accessed data and instruction for faster access by the CPU.
- 2 To permanently store data and programs
- 3 to provide additional storage space when the main memory is full.
- 4 to manage input and output operations between the CPU and peripherals.

Qus : 87 nimcet PYQ 2024 (<https://www.test.aspirestudy.in/library/pyq/1/nimcet?view=year&key=2024>)

Consider the program below which uses six temporary variables a, b, c, d, e, and f.

```
a = 1
b = 10
c = 20
d = a + b
e = c + d
f = c + e
b = c + e
e = b + f
d = f + c
```

```
u = 3 * e
return d + f
```

Assuming that all the above operations take their operands from registers, the minimum number of registers needed to execute this program without spilling is

- 1 6
- 2 4
- 3 5
- 4 3
