nimcet NIMCET 2026 PYQ (<https://www.test.aspirestudy.in/library/pyq/1/nimcet?view=topic&key=NIMCET 2026>)

Qus : 2

nimcet PYQ 2026 (<https://www.test.aspirestudy.in/library/pyq/1/nimcet?view=year&key=2026>)

Consider the following table.

Entry	Description
I. Solid State Drive	A. Volatile main memory that holds data currently in use by the OS and applications
II. Cache Memory	B. Long-term, non-volatile storage used for the operating system and large files
III. Random Access Memory (RAM)	C. Fastest and smallest storage available for processor computations
IV. CPU Registers	D. High-speed buffer memory between the CPU and RAM that holds frequently accessed data

Which of the following options is the correct match between the entries (I-IV) and the descriptions (A-D)?

1

2

3

I-B, II-D, III-A, IV-C

4

Qus : 21

nimcet PYQ 2026 (<https://www.test.aspirestudy.in/library/pyq/1/nimcet?view=year&key=2026>)

According to a recent newspaper report, an international team of astronomers studying nearly 446000 galaxies via the Hubble Space Telescope has confirmed that the expansion of the universe is accelerating. By utilising a technique known as "weak gravitational lensing" to observe how light is distorted by dark matter, researchers mapped the distribution of matter and the history of cosmic expansion, determining that an unknown force called "dark energy" has been driving this acceleration for the past two billion years. This study, which involved 1000 hours of observation and 600 Earth orbits by the Hubble telescope, marks the first time such measurements were successfully conducted using gravitational lensing alone, and it further reinforces the existence of an invisible web of dark matter that constitutes 80 of the universe.

Which of the following BEST summarises the main idea of the text above?

1

According to a recent newspaper report, an international team of astronomers have meticulously studied nearly 446000 galaxies involving 1000 hours of observation and 6

2

An international team of astronomers has noticed the presence of dark matter in the universe for the first time, according to a newspaper report. They did this by studying ne

Let $R \subset \mathbb{N} \times \mathbb{N}$. Which of the following statement is necessarily true?

- 1 If for each $a \in \mathbb{N}$ the set $R_a := \{b \in \mathbb{N} : (a, b) \in R\}$ has cardinality at most 1, then R represents a function $f : \mathbb{N} \rightarrow \mathbb{N}$
- 2 If for each $b \in \mathbb{N}$ the set $R^b := \{a \in \mathbb{N} : (a, b) \in R\}$ has cardinality at most 1, then R represents a function $f : \mathbb{N} \rightarrow \mathbb{N}$
- 3 If for some $a \in \mathbb{N}$ the set R_a is infinite then R_a and R have the same cardinality
- 4 If for all $a \in \mathbb{N}$ the set R_a is infinite then the cardinality of R is larger than that of R_a

Two statements are given below followed by two conclusions numbered (1) and (2). Which of the given conclusions logically follows from the two given statements? Please disregard commonly known facts.

Statements:

Some professors are doctors.

All the doctors are patients.

Conclusions:

1. Some professors are patients.
2. No doctor is professor.

- 1 Only (1) conclusion follows
- 2 Only (2) conclusion follows
- 3 Neither (1) nor (2) follows
- 4 Both (1) and (2) follow

Read the given paragraph. Select a conclusion which can be closely deduced.

Gig and platform workers need to work for at least 90 days annually with an aggregator to avail of social security benefits, said the final set of rules formulated under the new Code on Social Security (*CoSS*). In case a worker is engaged with multiple aggregators, the threshold is raised to 120 days, a decision that will affect those working with Swiggy and Zomato or Uber, Ola and Rapido. The rules pave the way for the states to notify their own rules by taking cue from the central ones. Under these latest CoSS rules, an eligible gig and platform worker includes all such workers engaged by the aggregator directly or through an associate, holding or subsidiary company or through a third party. Any income earned from aggregator on a day will be treated as one-day with the platform. For those on multiple platforms, workdays are cumulative. For instance, earning from three aggregators in one calendar day will be counted as three days of engagement.

- 1 All gig workers are automatically eligible to access social security benefits
- 2 If a gig worker works in three aggregator platforms, they need to work for 120 days in each platform to get the benefits
- 3 Aggregator platforms like Blinkit and Flipkart minutes who work on same business models as Swiggy or Rapido are not covered under Code on Social Security
- 4 Code of Social Security is given by the central government

In the context of "Sending, receiving, and managing emails", what is the primary difference between the POP3 and IMAP protocols?

1

POP3 is used for security, while IMAP is used for browsing.

2

POP3 downloads and usually deletes the email from the server; while IMAP syncs the email across multiple devices.

3

IMAP can only be used on Linux, while POP3 is for Windows.

4

There is no difference; they are different names for the same protocol.
